

Resume (Natural Language Processing)

Goal the project:

The purpose of this project is to parse information from a resume and help large companies to scan and filter resumes. so we will use machine learning algorithms (NLP) to help them.

- **EDA.**
- **NLP:**
 - Remove English stopwords
 - Remove extra white spaces, tabs and line breaks
 - Remove any digits and all punctuations.

After all these previous steps the most frequent words are visualized as Word Cloud

Data Visualisation
